

I pay for the services of XM radio and couldn't be happier about XM Instant Traffic & Weather. Since I pay for the XM service, I don't understand why it is under attack. No obscenities are ever present in the weather forecasts. Please reject NAB's petition 04-160 because I am a happy subscriber to XM and have found it to be more than my money's worth. I am thoroughly disgusted by urban commercial radio, as the music that is played is often degrading towards women and full of sexual innuendos.
